SUMMARY

B.Tech graduate in Artificial Intelligence and Data Science with hands-on experience in Full-Stack Development, Machine Learning, and REST API development. Built production-ready MERN applications, AI-powered web platforms, and end-to-end ML solutions using React, Node.js, Express.js, MongoDB, Python, and Java. Passionate about solving real-world problems through scalable software and eager to contribute as an entry-level Software Engineer, Full-Stack Developer, or Backend Developer.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), Python, Java
Frontend	React.js, HTML5, CSS3, Responsive Web Design
Backend	Node.js, Express.js, RESTful API Design, Flask, Microservices
Auth & DB	JWT Authentication, RBAC, MongoDB, MySQL, NoSQL
AI / ML	Machine Learning, Scikit-learn, Deep Learning, CNN, SVM, Logistic Regression, Pandas, NumPy, Matplotlib
Tools	Git, GitHub, Vercel, Render, Postman

EXPERIENCE

Machine Learning Intern — Generative AI Consortium

Jan 2024 – Apr 2024

[Node.js](#) [Express.js](#) [REST APIs](#) [Python](#) [Scikit-learn](#) [Pandas](#) [Feature Engineering](#)

- Designed and developed REST APIs using Node.js and Express.js to serve machine learning models for downstream applications.
- Applied feature engineering, data preprocessing, and hyperparameter tuning using Scikit-learn to improve machine learning model performance.
- Built automated data preprocessing pipelines using Python and Pandas to streamline dataset preparation and reduce manual effort.

PROJECTS

AI Travel Itinerary Generator

[GitHub](#) | [Live Demo](#)

[React.js](#) [Node.js](#) [Express.js](#) [MongoDB](#) [JWT](#) [Google Gemini API](#) [Tesseract.js](#) [OCR](#) [pdf-parse](#)

- Zero manual planning:** Accepts multi-format booking documents (PDF/JPG/PNG) and auto-generates a structured day-by-day itinerary with recommendations and packing list via Google Gemini LLM.
- 3-stage document pipeline:** OCR (Tesseract.js) for images and pdf-parse for PDFs extract data fed into Gemini to produce trip-specific itineraries end-to-end.
- 3 production features:** Public share links, downloadable itineraries, and personal trip dashboard; secured with JWT + bcrypt authentication.

PredictiX — Multi-Disease Prediction Platform

[GitHub](#) | [Live Demo](#)

[React.js](#) [Node.js](#) [Express.js](#) [MongoDB](#) [JWT](#) [Python](#) [Scikit-learn](#) [CNN](#) [InceptionResNet](#) [Deep Learning](#)

- Integrated Logistic Regression, SVM, CNN, and InceptionResNet V2 models into a MERN application to predict heart disease, diabetes, breast cancer, and lung cancer.
- Integrated Python machine learning models with an Express.js backend using Node.js Child Process, enabling real-time predictions without requiring a separate inference server.
- Implemented medical image upload, real-time disease prediction, PDF report generation, and secure authentication using JWT and role-based access control (RBAC).

OD Claimer — Institutional Workflow Automation System

[GitHub](#) | [Live Demo](#)

[React.js](#) [Node.js](#) [Express.js](#) [MongoDB](#) [JWT](#) [REST APIs](#) [RBAC](#)

- Developed a role-based web application used by 200+ students to digitise On-Duty (OD) request workflows for students, faculty, and administrators.
- Built React.js dashboards with real-time request tracking and status updates to streamline multi-level approval workflows.
- Implemented JWT authentication and role-based access control (RBAC) middleware in Express.js to secure application endpoints and enforce role-specific permissions.

EDUCATION

B.Tech in Artificial Intelligence and Data Science

2022 – 2026

Kongu Engineering College, Tamil Nadu

HSC (Class XII)

2022

SSRM Higher Secondary School

SSLC (Class X)

2020

SSRM Higher Secondary School

ACHIEVEMENTS

- Ideathon Finalist 2024** — Ranked **Top 10** out of **200+** teams for an AI-based product innovation at a national-level competition.
- HackSphere Hackathon Finalist 2023** — Designed and shipped a full-stack web application end-to-end within a **24-hour** national-level hackathon.
